iPhone 5c

Color. Yet another reason to love iPhone.

Every feature we add to iPhone must answer yes to one question: Will it make the experience better? So the colors of iPhone 5c received the same intense consideration we apply to everything we make. We even designed the Home screen and wallpaper colors to complement the exterior. As a result, using iPhone is that much more engaging and delightful.

iPod touch

The more advanced we made it,

the funnier it got.

Fun was built into every millimeter of the thinnest, lightest iPod touch. It does more than ever, move powerfully than ever, from playing games to playing music to just playing around. And everything looks tremendous on the 4-inch Retina display.

P1,549 x 9 months

All-new design

A ton of advanced technology. In just one pound.

iPad Air

The power of lightness.

You have to hold iPad Air to believe it. It's just 7.5 millimeters thin and weighs just one pound. The stunning Retina display sits inside thinner bezels, so all you see is your content. And an incredible amount of power lies inside the sleek enclosure. So you can do so much more. With so much less.

iPad 3

It's brilliant, in every sense of the word.

Ridic up the iPad with Retina display and suddenly, it's clear: You're actually touching your photos, reading a book, playing the piano. Nothing comes between you and what you love. That's because the fundamental elements of iPad — the display, the A5X chip, the cameras, the wireless connection — all work together to create the best possible experience. And they make iPad capable of so much more than you ever imagined.
